

Leg 1: Label the Anatomy

- | | | |
|-----------------------------|--------------------------|------------------------|
| 1. <u>D</u> Bladder | 4. <u>I</u> Scrotum | 7. <u>B</u> Epididymis |
| 2. <u>E</u> Seminal Vesicle | 5. <u>C</u> Vas Deferens | 8. <u>A</u> Testicle |
| 3. <u>G</u> Urethra | 6. <u>F</u> Prostate | 9. <u>H</u> Penis |

Leg 2: Fill in the Blanks

- Used for the passage of sperm or urine from the body (doesn't happen at the same time) Urethra
- Protective sac: Scrotum
- Coiled tube attached to each testicle: Epididymis
- Two long ducts that transport sperm: Vas Deferens
- Pair of organs that produce sperm and testosterone: Testicles

Leg 3: True or False?

- The bladder plays a key function in the reproductive system.
True **False**

The bladder is not technically part of the reproductive system, though it is close to the reproductive organs; it is part of the urinary system.

7. The testicles are part of the reproductive system *and* the urinary system.

True False

The testicles are part of the reproductive system and the endocrine system, as they produce the hormone testosterone.

8. It takes sperm about 4-6 weeks to travel through the epididymis.

True! False

9. The male testes begin the descent into the scrotum around 7 months in the womb.

True! False

The testes begin the descent into the scrotum around 7 months gestation, when the testes begin secreting reasonable quantities of testosterone.

10. Girls are more emotional during puberty than boys.

True False

Even before physical changes are noticeable, boys can feel overly sensitive, angry or anxious, during puberty.

11. During puberty, the male brain increases in size and ability to set long-term goals; this means that your choices now are important in shaping the kind of man you will become.

True! False

During puberty, the male brain reaches its largest physical size and is reshaped! The part of the brain behind the forehead, called the prefrontal cortex, is one of the last parts to mature. This area is responsible for skills like planning, prioritizing, and making good decisions.
